Create a path for every skill level and IT challenge

More than 50 full length courses, 200 days worth of content, serving 200,000 learners (since 2018)

Enable multi-cloud container platforms

Gain skills, knowledge, and abilities to create, configure, and manage your cloud application platform

An enterprise-ready Kubernetes container platform with full-stacked automated operations to manage hybrid cloud, multicloud, and edge deployments.

in staff competence with Red Hat OpenShift®

Students who attended training said

"For vendor training, this course was one of the best I've taken in my 30 years in industry."

- DO180 student,
Architect, IT industry

"Excellent introduction to containers and OpenShift. The instructor was very knowledgeable."

-DO180 student,
Manager, Education industry

"This was an excellent, well thought out and structured course, I benefitted strongly and the instructor is/was excellent."

-DO280 student,
Developer, Healthcare industry

"It's an excellent program. Every program should be like this."

- DO180 student,
Consultant, Business Services industry

"I loved this course, it was easy to follow. I particularly enjoyed the instructor, he was very clear and good at describing DevOps processes in broad terms and ideas before drilling down to the specifics of OpenShift."

-DO101 student, **Developer**, IT industry

"The class is very well organized. The instructor is well prepared and facilitated the class very professionally."

-DO288 student,
Developer, Financial Services industry

Decrease time to market with training in Ansible automation

Accelerate automation to scale people, processes, and infrastructure

Red Hat Ansible Automation Platform

A foundation for building and operating automation across organizations, which includes all the tools needed to implement enterprise-wide automation.

deployment of new
IT resources

Students who attended training said

"By far the best training I have ever attended professionally. The balance and pace of the lecture to hands on was great."

- Ansible course student, **Administrator**, IT industry

"Outstanding instructor. Provided insight and training far beyond what was in the training materials. Great examples that will be very helpful in the future."

- Ansible course student, **Developer**, Public Sector

"I have already recommended this training to other members of the workforce."

- Ansible course student, **Support Engineer**, Public Sector

"I am most impressed with Red Hat's Ansible training course. I would highly recommend."

- Ansible course student, **Developer**, Financial Services industry

"Comprehensive course that provided a detailed instruction of Ancible principles and function."

- Ansible course student, **Administrator**, IT industry

"An overall great experience with the virtual environment and the instructor."

- Ansible course student, **Support Engineer**

Close the gap in your Enterprise Linux skills

Upskill whether you're new to Linux, experienced, or already a master

Red Hat Enterprise Linux

An open source operating system that is the foundation from which you can scale existing apps—and roll out emerging technologies—across bare-metal, virtual, container, and all types of cloud environments.

Increase in job readiness
due to Red Hat Training

Students who attended training said

"Best Linux class I've had. Looking forward to attending another."

-RH124 student, **Public Sector**

"Best training I've had and best written explanations I've read!"

-RH124 student, **Support Engineer**

"Wish all of my training was this well-organized and informative!"

-RH124 student, **Developer, Public Sector**

"The curriculum and training are relevant to 'real-world' environments."

-RH199 student, **Administrator, Transportation industry**

"I have used Linux on and off for over a decade and I was surprised by the amount of new content that I have not seen before. It was very informational"

-RH199 student, **Administrator, Public Sector**

"WOW: Never had a class with this level of enthusiasm, technical acumen, preparation, and useful 'extras' for enriching a topic."
